shutterstock

A wide-angle photograph of a sky during the 'golden hour' of sunset or sunrise. The sun is positioned in the lower right quadrant, creating a bright, glowing light source that illuminates the clouds with warm, golden-yellow and orange tones. The upper portion of the sky is a deep, clear blue. Wispy, white and light-colored clouds are scattered across the sky, particularly concentrated around the sun and in the upper left. A large, semi-transparent 'shutterstock' watermark is centered horizontally across the middle of the image.
